(The form continues on the next page.)

What is the nature of your objection?

We will not allow you to build a proposed electric transmission power line on our property. 1st-We already have two high power transmission line on our property along with several wind towers. 2nd The proposed line would cut through the middle of several of our fields. 3rd It would interfere with the GPS equipment that we have on our tractors and combine. 4th We are concerned that the heavy equipment involved in the construction and maintenance of this line will damage our tile lines.

What is the remedy or relief that you seek?

We were told at the Osage meeting that the cost of this transmission line will be \$1 million dollars per mile. The Option A route or northern route is at least 2 miles longer, plus having six more 90° turns than the Option B route. That would add over 2 million dollars to the cost of the project. This alone should lead you to drop the plan for the option ~~A~~ route or the northern route.
